QB7 Series

Hall Effect Thickness Gauges

dmq Hall Effect Thickness Gauges also known as Magnetic Thickness Gauges are high precision, easy to operate instruments that are used to measure all types of non-ferrous or non-magnetic materials up to 22mm or 0.866' thick.

Ideal to measure thickness in...

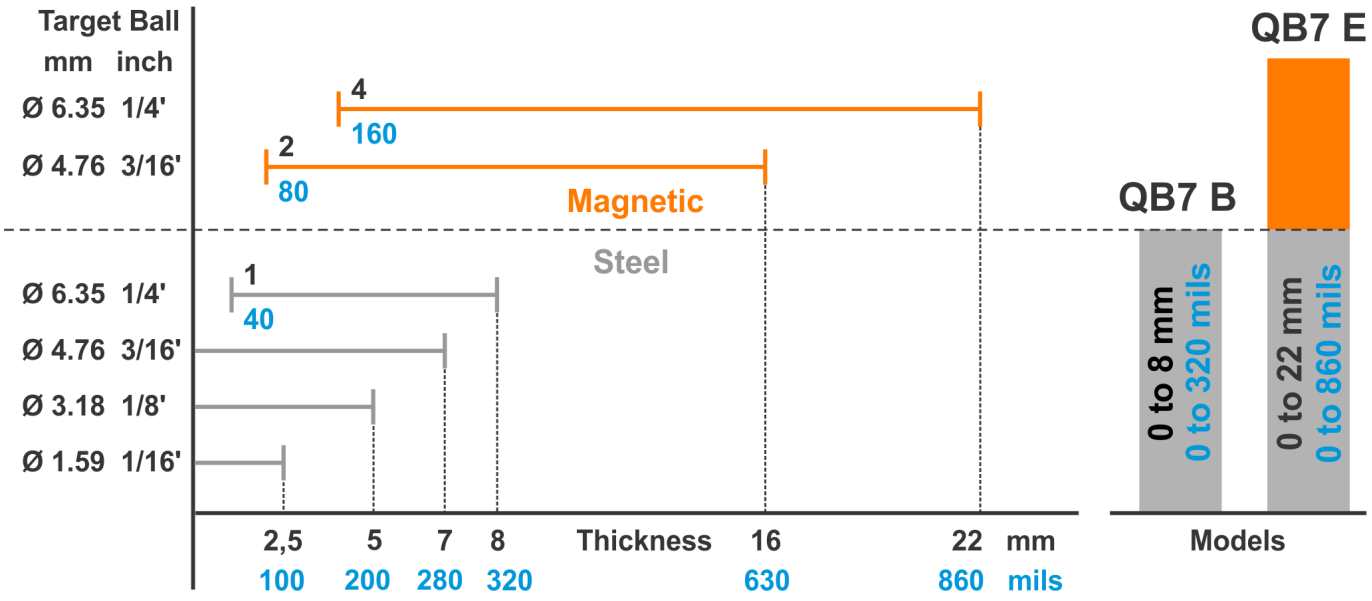

- Plastic, glass and aluminum containers and cans.
- Compound materials, laminates and rubbers.
- Non-ferrous casts with complex geometries.

- Standard range 0 to 8mm or 0.314'
- Extended range 0 to 22mm or 0.866'
- Accuracy 1~3% according to calibration
- Memory for 32000 measurements
- Data transfer via Bluetooth and USB
- Rugged aluminum enclosure
- Interchangeable titanium probe tips
- Fast measurements
- 5 year warranty on the electronic unit
- Best after sales support in the market
